

STUDYFLOW

User Persona & User Flow

1. User Persona

The following persona represents a typical college student who needs a simple way to organize study activities across multiple subjects.

Name	Ananya
Age	20
Occupation	College Student
Background	Manages several college subjects along with assignments, revision and exam preparation.
Goals	Stay organized, complete study tasks on time, manage multiple subjects and maintain a consistent study routine.
Pain Points	Forgets planned study tasks, finds it difficult to manage several subjects and does not want to spend much time maintaining a planner.
Needs	Quick task creation, a clear daily overview, easy task completion and a simple progress summary.
Motivation	Wants to feel organized and know exactly what to study next.

Persona Statement

"I want a simple way to know what I need to study, organize my tasks and keep track of what I have completed without spending a lot of time managing the planner."

2. User Flow

The user flow describes the main path a student follows through StudyFlow, from entering the app to reviewing study progress.

Step	Screen	User Action
01	Welcome / Login	User enters the StudyFlow app.
02	Home / Dashboard	User sees today's planned study tasks.

Step	Screen	User Action
03	My Subjects	User views the subjects they are studying.
04	Add Study Task	User adds a subject, topic and study time.
05	Task Details	User views the task and can mark it as completed.
06	Progress	User checks completed and remaining study work.

3. Flow Summary

Welcome → Home → Subjects → Add Study Task → Task Details → Progress

This flow keeps the main journey short and focuses on the core actions a student needs: viewing study tasks, organizing subjects, adding a task, completing it and checking progress.

4. User Flow Goal

The goal is to minimize unnecessary steps so that a student can quickly move from deciding what to study to recording the task and tracking its completion.
